Build the future of financial technology.

Q2 interns contribute to real projects that help banks and credit unions better serve their customers.

Paid internship | 12 weeks | Austin, TX | Hybrid office environment

BY THE NUMBERS

A program that's grown alongside the company.

300+
Interns hosted since the program began in 2012.

34
Internal teams that take on interns, from engineering to HR.

+94
Net promoter score interns give the program.

90%
Acceptance rate among 2026 interns who received full-time offers.

27
Colleges and universities represented in a typical class.

WHAT YOU'LL EXPERIENCE

Real work, structured support, from week one.

Week 1 — Onboarding and team placement
Meet your manager and assigned mentor, get set up on your team's tools, and scope your summer project together.

Weeks 2–4 — Ramp up with real ownership
Start contributing to production work alongside your team, with weekly 1:1s to check progress and adjust scope.

Mid — Executive speaker series
Small-group sessions with senior leaders across product, engineering, and finance—direct access, direct questions.

Ongoing — Skill-building sessions
Various workshops on interviewing, presenting, giving and receiving feedback, and working cross-functionally.

Final — Project showcase
Present your work to your team and leadership—and hear where a full-time role could take it next.

WHY INTERNS SAY YES

Mentorship, meaningful projects, and a clear path to grow.

Q2 has been named one of the Austin American-Statesman's Top Workplaces year after year.

Mentorship, built in
Every intern is paired with a mentor, plus weekly 1:1s with their manager throughout the summer.

Clear path to full-time
44% of the 2026 class converted to a full-time offer at the end of the program.

A connected intern experience
Social and culture events helped turn the intern class into a connected cohort.

WHERE CAN YOU CONTRIBUTE

Explore opportunities in the area that best fits your major.

Product & Engineering
Build and ship features used by real financial institutions.

Data Science
Work with production data on fraud, risk, and analytics.

Finance & Accounting
Support planning, reporting, and analysis for a public company.

Sales & Marketing
Help tell the story of Q2's platform to banks and credit unions.

HR & Legal
Get exposure to people operations and corporate legal work.
